Awards

Michigan Newsmaker of the Year (2017)

Green Power Leadership Award EPA (2019)

Adam is an experienced data center executive with a proven track record of developing more than 1.2 Gigawatts of data center capacity globally. As Partner, Data Center Group, Adam is responsible for end-to-end development of all data center projects across North America.

Prior to joining Panattoni, Adam was the Executive Vice President of Strategy at Switch where he led the incentive creation for multiple hyperscale campus locations. While at Switch, Adam pioneered the company's transition to using 100% renewable energy, working with utilities in Nevada, Georgia, and Michigan to create some of the first green energy tariffs in the United States.

Additionally, Adam worked with large independent power producers to develop more than 400 Megawatts of new, utility-scale renewable generation resources. Greenpeace, the White House, and the EPA, among other organizations, have recognized Adam's work.

Beyond his professional endeavors, Adam is deeply committed to community service. He is the chairman of Renown Health (a \$2b annual revenue not-for-profit health care system) and is a current Trustee and past Chairman for the Reno Tahoe Airport Authority. Adam lives in Reno, Nevada, with his wife and three children.

Project Experience

- Switch Tahoe – Reno Campus 650 MW. Secured 100% Renewable energy and 100% effluent water
- Switch Atlanta Campus 150 MW. Secured 100% renewable energy
- Switch Michigan Campus 110 MW. Secured 100% renewable energy
- Switch Las Vegas Campus 495 MW. Secured 100% renewable energy
- SUPERNAP Italia 50 MW
